water resources and environmental engineering

**Building  
Our  
Future**

... because water is precious

**Alan H. Plummer, Jr., P.E., D.E.E.**  
Chairman of the Board  
Alan Plummer Associates, Inc.

*We* have a responsibility to our environment.

As a firm and as an industry, we need to protect our water resources for future generations. Our firm is committed to dedicating high-level resources to this responsibility.

I am looking forward to focusing my time in continuing to find innovative solutions that demonstrate environmental stewardship. I will be more involved in the technical aspects of our projects as well as the overall vision of water resources, both on behalf of our firm and of our profession.

The success of our firm has always been a team effort, and as always, our principals will continue to lead in our day-to-day operations with the full support of our Board of Directors.

So, as I will remain Chairman of the Board of Directors and active in our projects, I pass the baton of administration and operations – the duties of president – to Principal Alan Tucker.

*Alan H. Plummer, Jr.*

**Alan R. Tucker, P.E.**  
President  
Alan Plummer Associates, Inc.

*We* are committed to our clients.

It is both our mission and our obligation that our service to clients be distinguished by quality and performed with integrity. As president of Alan Plummer Associates, Inc., I will help ensure that each of our projects maintains our high standards of excellence. Whether it is initial evaluation, design, plans and specifications preparation, or any of our other services, our clients should see the value of our commitment.

Over the last 27 years, our team has been led by environmental and engineering professionals recognized as experts in our industry. Those team members will continue to provide their leadership, expertise, and outstanding service to our clients and to our staff as we continue to grow.

I am excited to step into this leadership role – to help our clients, our firm, and our industry meet the challenges as we move forward.

*Alan R. Tucker*
